Is the transcript shared with your Electronic Medical Record (EMR) vendor? ☐ yes ☐ no

Can you remove AI Scribe without affecting your other systems?

☐ yes ☐ no

How do you communicate your AI Scribe policy to patients? _____

Other questions:

Dear Clinician,

We patients are asking these questions because we are concerned about how AI is being used in health care. We know that as guardians of our health information, you carry responsibilities to protect our information. We would like to help you with this responsibility.

We are aware that your systems are not Canadian built. This worries us because with the internet, our data has the possibility to travel outside of Canada. We want our information to remain in Canada.

Please communicate your answers to these questions on our Checklist to all of your patients. This will ensure your patients are fully informed **before** you ask for their consent.

We thank you for your time.
